

# Use Case 3: Cancel Movie Screening

## Name:

Cancel Movie Screening

## Description:

This use case covers **removing** an existing movie screening from the system schedule.

## Actors:

Staff

## Triggers:

The use case is triggered by administrative staff who intend to cancel a movie screening.

## Preconditions:

The screening (screen and timeslot) for that movie must already exist in the movie arrangement.

## Postconditions:

After the use case is completed, the **movie screening (screen or time)** of the movie arrangement will have been removed.

## Course of events:

## Basic course of events:

1. The user enters the name of the movie that one of its screenings will be removed from the scheduled list.
2. The system highlights the movie to indicate it is selected, shows the screening schedules (timeslot and screen) for the requested movie.
3. The user selects the timeslot and screen for the particular movie screening, and perform the cancel movie screening function.
4. The system asks the user to confirm.
5. The user selects yes.
6. The requested movie screening is removed from the system and the display will be updated.
